Combinatorics and Graph Theory (Undergraduate Texts in Mathematics) John Harris, Jeffrey L. Hirst, Michael Mossinghoff

These notes were first used in an introductory course team taught by the authors at Appalachian State University to advanced undergraduates and beginning graduates. The text was written with four pedagogical goals in mind: offer a variety of topics in one course, get to the main themes and tools as efficiently as possible, show the relationships between the different topics, and include recent results to convince students that mathematics is a living discipline.
