DevOps: A Software Architect's Perspective (SEI Series in Software Engineering) Len Bass, Ingo Weber, Liming Zhu

The First Complete Guide to DevOps for Software Architects

DevOps promises to accelerate the release of new software features and improve monitoring of systems in production, but its crucial implications for software architects and architecture are often ignored.

In *DevOps: A Software Architect's Perspective*, three leading architects address these issues head-on. The authors review decisions software architects must make in order to achieve DevOps' goals and clarify how other DevOps participants are likely to impact the architect's work. They also provide the organizational, technical, and operational context needed to deploy DevOps more efficiently, and review DevOps' impact on each development phase. The authors address cross-cutting concerns that link multiple functions, offering practical insights into compliance, performance, reliability, repeatability, and security.

This guide demonstrates the authors' ideas in action with three real-world case studies: datacenter replication for business continuity, management of a continuous deployment pipeline, and migration to a microservice architecture.

Comprehensive coverage includes

- Why DevOps can require major changes in both system architecture and IT roles
- How virtualization and the cloud can enable DevOps practices
- Integrating operations and its service lifecycle into DevOps
- Designing new systems to work well with DevOps practices
- Integrating DevOps with agile methods and TDD
- Handling failure detection, upgrade planning, and other key issues
- Managing consistency issues arising from DevOps' independent deployment models
- Integrating security controls, roles, and audits into DevOps
- Preparing a business plan for DevOps adoption, rollout, and measurement

From reader reviews:

Theresa Wilkins:

Information is provisions for individuals to get better life, information these days can get by anyone from everywhere. The information can be a understanding or any news even an issue. What people must be consider any time those information which is inside former life are challenging be find than now's taking seriously which one would work to believe or which one often the resource are convinced. If you obtain the unstable resource then you buy it as your main information it will have huge disadvantage for you. All those possibilities will not happen in you if you take DevOps: A Software Architect's Perspective (SEI Series in Software Engineering) as the daily resource information.

Harold Baughman:

Playing with family in the park, coming to see the marine world or hanging out with pals is thing that usually you may have done when you have spare time, and then why you don't try thing that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love DevOps: A Software Architect's Perspective (SEI Series in Software Engineering), you can enjoy both. It is good combination right, you still would like to miss it? What kind of hang-out type is it? Oh occur its mind hangout people. What? Still don't have it, oh come on its called reading friends.

Donald Bonilla:

In this era globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You can see that now, a lot of publisher that print many kinds of book. The book that recommended to you personally is DevOps: A Software Architect's Perspective (SEI Series in Software Engineering) this book consist a lot of the information with the condition of this world now. This particular book was represented how do the world has grown up. The dialect styles that writer use to explain it is easy to understand. The actual writer made some study when he makes this book. Here is why this book acceptable all of you.

Jacob Brown:

Beside this particular DevOps: A Software Architect's Perspective (SEI Series in Software Engineering) in your phone, it might give you a way to get nearer to the new knowledge or information. The information and the knowledge you might got here is fresh from oven so don't be worry if you feel like an aged people live in narrow village. It is good thing to have DevOps: A Software Architect's Perspective (SEI Series in Software Engineering) because this book offers for you readable information. Do you oftentimes have book but you do not get what it's facts concerning. Oh come on, that will not happen if you have this within your hand. The Enjoyable arrangement here cannot be questionable, such as treasuring beautiful island. Techniques you still

want to miss the idea? Find this book as well as read it from currently!
