Climate Change, Energy, Sustainability and Pavements (Green Energy and Technology)

Climate Change, Energy, Sustainability and Pavements (Green Energy and Technology)

Climate change, energy production and consumption, and the need to improve the sustainability of all aspects of human activity are key inter-related issues for which solutions must be found and implemented quickly and efficiently. To be successfully implemented, solutions must recognize the rapidly changing socio-techno-political environment and multi-dimensional constraints presented by today's interconnected world. As part of this global effort, considerations of climate change impacts, energy demands, and incorporation of sustainability concepts have increasing importance in the design, construction, and maintenance of highway and airport pavement systems. To prepare the human capacity to develop and implement these solutions, many educators, policy-makers and practitioners have stressed the paramount importance of formally incorporating sustainability concepts in the civil engineering curriculum to educate and train future civil engineers well-equipped to address our current and future sustainability challenges.

This book will prove a valuable resource in the hands of researchers, educators and future engineering leaders, most of whom will be working in multidisciplinary environments to address a host of next-generation sustainable transportation infrastructure challenges.

"This book proposes a broad detailed overview of the actual scientific knowledge about pavements linked to climate change, energy and sustainability at the international level in an original multidimensional/multi-effects way. By the end, the reader will be aware of the whole global issues to care about for various pavement technical features around the world, among which the implications of modelling including data collection, challenging resources saving and infrastructures services optimisation. This is a complete and varied work, rare in the domain."

Dr. Agnes Jullien
Research Director
Director of Environmental, Development, Safety and Eco-Design Laboratory (EASE)
Department of Development, Mobility and Environment
Ifsttar Centre de Nantes
Cedex- France

"An excellent compilation of latest developments in the field of sustainable pavements. The chapter topics have been carefully chosen and are very well-organized with the intention of equipping the reader with the state-of-the-art knowledge on all aspects of pavement sustainability. Topics covered include pavement Life Cycle Analysis (LCA), pervious pavements, cool pavements, photocatalytic pavements, energy harvesting pavements, etc. which will all be of significant interest to students, researchers, and practitioners of pavement engineering. This book will no doubt serve as an excellent reference on the topic of sustainable pavements."

Dr. Wei-Hsing Huang
Editor-in-Chief of International Journal of Pavement Research and Technology (IJPRT) and Professor of Civil Engineering
National Central University
Taiwan

From reader reviews:

William Roger:

Reading a guide tends to be new life style with this era globalization. With looking at you can get a lot of information that can give you benefit in your life. Together with book everyone in this world could share their idea. Publications can also inspire a lot of people. Many author can inspire their particular reader with their story as well as their experience. Not only the storyline that share in the books. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors in this world always try to improve their ability in writing, they also doing some research before they write with their book. One of them is this Climate Change, Energy, Sustainability and Pavements (Green Energy and Technology).

Ronald Karl:

The particular book Climate Change, Energy, Sustainability and Pavements (Green Energy and Technology) has a lot info on it. So when you read this book you can get a lot of advantage. The book was compiled by the very famous author. Tom makes some research before write this book. This kind of book very easy to read you may get the point easily after perusing this book.

Sheila Seim:

Reading can called mind hangout, why? Because while you are reading a book specifically book entitled Climate Change, Energy, Sustainability and Pavements (Green Energy and Technology) your head will drift away trough every dimension, wandering in every aspect that maybe not known for but surely will become your mind friends. Imaging just about every word written in a book then become one contact form conclusion and explanation this maybe you never get ahead of. The Climate Change, Energy, Sustainability and Pavements (Green Energy and Technology) giving you an additional experience more than blown away your brain but also giving you useful data for your better life within this era. So now let us explain to you the relaxing pattern the following is your body and mind is going to be pleased when you are finished examining it, like winning a sport. Do you want to try this extraordinary wasting spare time activity?

Henry Woods:

Reading a book being new life style in this year; every people loves to go through a book. When you go through a book you can get a large amount of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. In order to get information about your analysis, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, these kinds of us novel, comics, and also soon. The Climate Change, Energy, Sustainability and Pavements (Green Energy and Technology) provide you with new experience in looking at a book.
