Life Cycle Assessment of Renewable Energy Sources (Green Energy and Technology)

Life Cycle Assessment of Renewable Energy Sources (Green Energy and Technology)

Governments are setting challenging targets to increase the production of energy and transport fuel from sustainable sources. The emphasis is increasingly on renewable sources including wind, solar, geothermal, biomass based biofuel, photovoltaics or energy recovery from waste. What are the environmental consequences of adopting these other sources? How do these various sources compare to each other?

Life Cycle Assessment of Renewable Energy Sources tries to answer these questions based on the universally adopted method of Life Cycle Assessment (LCA). This book introduces the concept and importance of LCA in the framework of renewable energy sources and discusses the key issues in conducting their LCA. This is followed by an in-depth discussion of LCA for some of the most common bioenergy sources such as agricultural production systems for biogas and bioethanol, biogas from grass, biodiesel from palm oil, biodiesel from used cooking oil and animal fat, Jatropha biodiesel, lignocellulosic bioethanol, ethanol from cassava and sugarcane molasses, residential photovoltaic systems, wind energy, microalgal biodiesel, biohydrogen and biomethane. Through real examples, the versatility of LCA is well emphasized.

Written by experts all over the globe, the book is a cornucopia of information on LCA of bioenergy systems and provides a platform for stimulation of new ideas and thoughts. The book is targeted at practitioners of LCA and will become a useful tool for researchers working on different aspects of bioenergy.

From reader reviews:

Kiley Kaufman:

Have you spare time for any day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity intended for spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to the Mall. How about open or read a book titled Life Cycle Assessment of Renewable Energy Sources (Green Energy and Technology)? Maybe it is to get best activity for you. You understand beside you can spend your time together with your favorite's book, you can wiser than before. Do you agree with it is opinion or you have various other opinion?

Mildred Hall:

Reading a reserve can be one of a lot of exercise that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a e-book will give you a lot of new data. When you read a reserve you will get new information mainly because book is one of a number of ways to share the information or their idea. Second, reading a book will make you actually more imaginative. When you studying a book especially fiction book the author will bring you to imagine the story how the character types do it anything. Third, you could share your knowledge to other people. When you read this Life Cycle Assessment of Renewable Energy Sources (Green Energy and Technology), you are able to tells your family, friends and soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a guide.

Justin Pritchett:

A lot of people always spent their particular free time to vacation as well as go to the outside with them family members or their friend. Did you know? Many a lot of people spent many people free time just watching TV, or perhaps playing video games all day long. If you would like try to find a new activity here is look different you can read a book. It is really fun for you. If you enjoy the book that you just read you can spent 24 hours a day to reading a guide. The book Life Cycle Assessment of Renewable Energy Sources (Green Energy and Technology) it is extremely good to read. There are a lot of people that recommended this book. These folks were enjoying reading this book. In case you did not have enough space to develop this book you can buy the e-book. You can m0ore quickly to read this book through your smart phone. The price is not to cover but this book has high quality.

Awilda Kell:

You can spend your free time to learn this book this reserve. This Life Cycle Assessment of Renewable Energy Sources (Green Energy and Technology) is simple bringing you can read it in the recreation area, in the beach, train as well as soon. If you did not get much space to bring the actual printed book, you can buy the e-book. It is make you quicker to read it. You can save the book in your smart phone. So there are a lot of benefits that you will get when one buys this book.
