Air Safety Investigators: Using Science to Save Lives-One Crash at a Time

Alan E. Diehl

Air Safety Investigators: Using Science to Save Lives-One Crash at a Time Alan E. Diehl

This fascinating story explains how aviation crashes are investigated, and what goes on behind the scenes to improve safety. It is also the untold saga of how one maverick scientist battled the bureaucracy to save lives.

Federal officials hired him to prevent an anticipated bloodbath from airline deregulation. He soon introduced innovations, such as Crew Resource Management training, which dramatically reduced airline accidents. However, when he dared expose lies to Congress, officials used the sky marshals to harass him. They then ignored his other programs, which contributed to countless unnecessary deaths -- including JFK Junior's.

Becoming a military safety guru, his important tasks included training Air Force One crews, and going undercover to discover why a mysterious Soviet airliner crash killed an African president.

But he was fired for blowing the whistle on the Pentagon cover-up of the worst fratricide since Vietnam. Congress and other important organizations have often sought his advice on civil and military aviation problems.
