Math Circles for Elementary School Students: Berkeley 2009 and Manhattan 2011 (MSRI Mathematical Circles Library) Natasha Rozhkovskaya

The main part of this book describes the first semester of the existence of a successful and now highly popular program for elementary school students at the Berkeley Math Circle. The topics discussed in the book introduce the participants to the basics of many important areas of modern mathematics, including logic, symmetry, probability theory, knot theory, cryptography, fractals, and number theory. Each chapter in the first part of this book consists of two parts. It starts with generously illustrated sets of problems and hands-on activities. This part is addressed to young readers who can try to solve problems on their own or to discuss them with adults. The second part of each chapter is addressed to teachers and parents. It includes comments on the topics of the lesson, relates those topics to discussions in other chapters, and describes the actual reaction of math circle participants to the proposed activities. The supplementary problems that were discussed at workshops of Math Circle at Kansas State University are given in the second part of the book. The book is richly illustrated, which makes it attractive to its young audience. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents and teachers, and the mathematics profession. Titles in this series are co-published with the Mathematical Sciences Research Institute (MSRI).

From reader reviews:

Pamela Bradley:

As people who live in often the modest era should be revise about what going on or info even knowledge to make all of them keep up with the era that is always change and move ahead. Some of you maybe will certainly update themselves by looking at books. It is a good choice for you but the problems coming to you is you don't know what type you should start with. This Math Circles for Elementary School Students: Berkeley 2009 and Manhattan 2011 (MSRI Mathematical Circles Library) is our recommendation to make you keep up with the world. Why, since this book serves what you want and want in this era.

Judith Tate:

The book untitled Math Circles for Elementary School Students: Berkeley 2009 and Manhattan 2011 (MSRI Mathematical Circles Library) contain a lot of information on this. The writer explains your girlfriend idea with easy method. The language is very clear to see all the people, so do not really worry, you can easy to read that. The book was published by famous author. The author brings you in the new period of literary works. It is possible to read this book because you can continue reading your smart phone, or gadget, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site and also order it. Have a nice study.

Michelle Mills:

In this time globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of sources to get information example: internet, paper, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. Often the book that recommended to your account is Math Circles for Elementary School Students: Berkeley 2009 and Manhattan 2011 (MSRI Mathematical Circles Library) this guide consist a lot of the information from the condition of this world now. This particular book was represented how can the world has grown up. The dialect styles that writer use to explain it is easy to understand. The actual writer made some exploration when he makes this book. That's why this book appropriate all of you.

Betsy Haley:

You can find this Math Circles for Elementary School Students: Berkeley 2009 and Manhattan 2011 (MSRI Mathematical Circles Library) by visit the bookstore or Mall. Just simply viewing or reviewing it can to be your solve problem if you get difficulties to your knowledge. Kinds of this reserve are various. Not only by simply written or printed but can you enjoy this book by means of e-book. In the modern era including now, you just looking by your local mobile phone and searching what their problem. Right now, choose your current ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still up-date. Let's try to choose appropriate ways for you.
