## **Mineral Wool: Production and Properties (Woodhead Publishing Series in Metals and Surface Engineering)** B Sirok, B Blagojevic, P Bullen

Mineral wool has a unique range of properties combining high thermal resistance with long-term stability. It is made from molten glass, stone or slag that is spun into a fibre-like structure which creates a combination of properties that no other insulation material can match. It has the ability to save energy, minimize pollution, combat noise, reduce the risk of fire and protect life and property in the event of fire.

Mineral wool: Production and properties describes the technological process of mineral wool production and the physical characteristics of the melt and theoretical bases of multiregression and dimensionless theory. This is followed by the introduction of the fibre cooling model in the blow-away flow and the influence of temperature in the melt film (on the rotating centrifuge wheels) on the thickness of forming fibres.

The second part predominantly focuses on the use of computer-aided visualisation: tools for the diagnostics of fibre and primary layer formation. Special attention is given to the study of aerodynamic characteristics of the airflow which significantly influences the quality of the final product.

Mineral wool: Production and properties is suitable for engineers, researchers and for graduate and postgraduate students who want to broaden their knowledge of experimental methods in this field.

- Describes the technological process of mineral wool production and the physical characteristics
- Focuses on the use of computer-aided visualisation and discusses aerodynamic characteristics of the airflow
- Essential for engineers, researchers and students to gain knowledge of experimental methods in this field

### **From reader reviews:**

#### **Edward Rideout:**

Now a day folks who Living in the era wherever everything reachable by match the internet and the resources inside it can be true or not call for people to be aware of each data they get. How a lot more to be smart in having any information nowadays? Of course the solution is reading a book. Looking at a book can help people out of this uncertainty Information particularly this Mineral Wool: Production and Properties (Woodhead Publishing Series in Metals and Surface Engineering) book because book offers you rich facts and knowledge. Of course the details in this book hundred pct guarantees there is no doubt in it you probably know this.

#### **Cheryl Grosvenor:**

Typically the book Mineral Wool: Production and Properties (Woodhead Publishing Series in Metals and Surface Engineering) has a lot info on it. So when you read this book you can get a lot of help. The book was compiled by the very famous author. Tom makes some research prior to write this book. This kind of book very easy to read you can obtain the point easily after looking over this book.

#### **Vera Harris:**

People live in this new time of lifestyle always try to and must have the time or they will get wide range of stress from both day to day life and work. So , when we ask do people have time, we will say absolutely without a doubt. People is human not only a robot. Then we question again, what kind of activity are there when the spare time coming to you of course your answer will certainly unlimited right. Then do you ever try this one, reading books. It can be your alternative within spending your spare time, the actual book you have read is usually Mineral Wool: Production and Properties (Woodhead Publishing Series in Metals and Surface Engineering).

#### **Vickie Duke:**

Don't be worry when you are afraid that this book will filled the space in your house, you may have it in e-book way, more simple and reachable. This specific Mineral Wool: Production and Properties (Woodhead Publishing Series in Metals and Surface Engineering) can give you a lot of buddies because by you checking out this one book you have factor that they don't and make an individual more like an interesting person. This kind of book can be one of a step for you to get success. This guide offer you information that perhaps your friend doesn't know, by knowing more than different make you to be great persons. So , why hesitate? We need to have Mineral Wool: Production and Properties (Woodhead Publishing Series in Metals and Surface Engineering).
