Human Walking in Virtual Environments: Perception, Technology, and Applications

Human Walking in Virtual Environments: Perception, Technology, and Applications

This book presents a survey of past and recent developments on human walking in virtual environments with an emphasis on human self-motion perception, the multisensory nature of experiences of walking, conceptual design approaches, current technologies, and applications. The use of Virtual Reality and movement simulation systems is becoming increasingly popular and more accessible to a wide variety of research fields and applications. While, in the past, simulation technologies have focused on developing realistic, interactive visual environments, it is becoming increasingly obvious that our everyday interactions are highly multisensory. Therefore, investigators are beginning to understand the critical importance of developing and validating locomotor interfaces that can allow for realistic, natural behaviours. The book aims to present an overview of what is currently understood about human perception and performance when moving in virtual environments and to situate it relative to the broader scientific and engineering literature on human locomotion and locomotion interfaces. The contents include scientific background and recent empirical findings related to biomechanics, self-motion perception, and physical interactions. The book also discusses conceptual approaches to multimodal sensing, display systems, and interaction for walking in real and virtual environments. Finally, it will present current and emerging applications in areas such as gait and posture rehabilitation, gaming, sports, and architectural design.

From reader reviews:

Peter Holmes:

As people who live in typically the modest era should be revise about what going on or info even knowledge to make them keep up with the era that is certainly always change and make progress. Some of you maybe can update themselves by examining books. It is a good choice in your case but the problems coming to an individual is you don't know which you should start with. This Human Walking in Virtual Environments: Perception, Technology, and Applications is our recommendation so you keep up with the world. Why, since this book serves what you want and need in this era.

Donald Foster:

The feeling that you get from Human Walking in Virtual Environments: Perception, Technology, and Applications could be the more deep you rooting the information that hide inside words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to comprehend but Human Walking in Virtual Environments: Perception, Technology, and Applications giving you enjoyment feeling of reading. The writer conveys their point in particular way that can be understood by anyone who read that because the author of this e-book is well-known enough. This book also makes your personal vocabulary increase well. It is therefore easy to understand then can go to you, both in printed or e-book style are available. We advise you for having this kind of Human Walking in Virtual Environments: Perception, Technology, and Applications instantly.

Colleen Edwards:

Reading a publication can be one of a lot of action that everyone in the world really likes. Do you like reading book therefore. There are a lot of reasons why people enjoyed. First reading a publication will give you a lot of new info. When you read a publication you will get new information since book is one of various ways to share the information or even their idea. Second, studying a book will make you more imaginative. When you studying a book especially fiction book the author will bring someone to imagine the story how the characters do it anything. Third, you are able to share your knowledge to other people. When you read this Human Walking in Virtual Environments: Perception, Technology, and Applications, you are able to tells your family, friends along with soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a publication.

Josephine Weeks:

The reserve with title Human Walking in Virtual Environments: Perception, Technology, and Applications includes a lot of information that you can understand it. You can get a lot of advantage after read this book. This particular book exist new understanding the information that exist in this publication represented the condition of the world today. That is important to yo7u to learn how the improvement of the world. This particular book will bring you in new era of the syndication. You can read the e-book on the smart phone, so

you can read it anywhere you want.
