Modern Technologies for Landslide Monitoring and Prediction (Springer Natural Hazards)

Modern Technologies for Landslide Monitoring and Prediction (Springer Natural Hazards)

Modern Technologies for Landslide Investigation and Prediction presents eleven contributed chapters from Chinese and Italian authors, as a follow-up of a bilateral workshop held in Shanghai on September 2013. Chapters are organized in three main parts: ground-based monitoring techniques (photogrammetry, terrestrial laser scanning, ground-based InSAR, infrared thermography, and GNSS networks), geophysical (passive seismic sensor networks) and geotechnical methods (SPH and SLIDE), and satellite remote-sensing techniques (InSAR and optical images). Authors of these contributes are internationally-recognized experts in their respective research fields.

Marco Scaioni works in the college of Surveying and Geo-Informatics at Tongji University, Shanghai (P.R. China). His research fields are mainly Close-range Photogrammetry, Terrestrial Laser Scanning, and other ground-based sensors for metrological and deformation monitoring applications to structural engineering and geosciences. In the period 2012-2016 he is chairman of the Working Group V/3 in the International Society for Photogrammetry and Remote Sensing, focusing on 'Terrestrial 3D Imaging and Sensors'.

From reader reviews:

Lesley Dwyer:

The book *Modern Technologies for Landslide Monitoring and Prediction* (Springer Natural Hazards) give you a sense of feeling enjoy for your spare time. You need to use to make your capable much more increase. Book can being your best friend when you getting stress or having big problem together with your subject. If you can make reading through a book *Modern Technologies for Landslide Monitoring and Prediction* (Springer Natural Hazards) to be your habit, you can get more advantages, like add your capable, increase your knowledge about many or all subjects. You may know everything if you like available and read a reserve *Modern Technologies for Landslide Monitoring and Prediction* (Springer Natural Hazards). Kinds of book are several. It means that, science book or encyclopedia or other folks. So , how do you think about this e-book?

Rene Hudson:

The book *Modern Technologies for Landslide Monitoring and Prediction* (Springer Natural Hazards) can give more knowledge and information about everything you want. Why then must we leave a good thing like a book *Modern Technologies for Landslide Monitoring and Prediction* (Springer Natural Hazards)? Some of you have a different opinion about book. But one aim this book can give many details for us. It is absolutely appropriate. Right now, try to closer together with your book. Knowledge or details that you take for that, it is possible to give for each other; you may share all of these. Book *Modern Technologies for Landslide Monitoring and Prediction* (Springer Natural Hazards) has simple shape however, you know: it has great and big function for you. You can appear the enormous world by start and read a book. So it is very wonderful.

Christina Webb:

Do you have something that you prefer such as book? The e-book lovers usually prefer to select book like comic, quick story and the biggest you are novel. Now, why not attempting *Modern Technologies for Landslide Monitoring and Prediction* (Springer Natural Hazards) that give your fun preference will be satisfied through reading this book. Reading routine all over the world can be said as the means for people to know world considerably better then how they react towards the world. It can't be stated constantly that reading routine only for the geeky individual but for all of you who wants to be success person. So , for every you who want to start studying as your good habit, you are able to pick *Modern Technologies for Landslide Monitoring and Prediction* (Springer Natural Hazards) become your current starter.

Wesley Baker:

Many people said that they feel fed up when they reading a e-book. They are directly felt this when they get a half portions of the book. You can choose the actual book *Modern Technologies for Landslide Monitoring and Prediction* (Springer Natural Hazards) to make your current reading is interesting. Your personal skill of reading skill is developing when you like reading. Try to choose simple book to make you enjoy to learn it

and mingle the idea about book and reading through especially. It is to be initially opinion for you to like to wide open a book and learn it. Beside that the reserve Modern Technologies for Landslide Monitoring and Prediction (Springer Natural Hazards) can to be your brand-new friend when you're feel alone and confuse with the information must you're doing of these time.
