Grid and Cluster Computing C.S.R. Prabhu

Grid Computing and Cluster Computing are advanced topics and latest trends in computer science that find a place in the computer science and information technology curricula of many engineering institutes and universities today. Divided into two parts—Part I, Grid Computing and Part II, Cluster Computing—, this compact and concise text strives to make the concepts of grid computing and cluster computing comprehensible to the students through its fine presentation and accessible style. Part I of the book enables the student not only to understand the concepts involved in grid computing but also to build their own grids for specific applications.

Similarly, as today supercomputers are being built using cluster computing architectures, Part II provides an insight into the basic principles involved in cluster computing and equips the readers with the knowledge to build their own clusters in-house.

Diagrams are used to illustrate the concepts discussed and to enable the reader to actually construct a grid or a cluster himself.

The book is intended as a text for undergraduate and postgraduate students of computer science and engineering, information technology (B.Tech./M.Tech. Computer Science and Engineering/IT), and postgraduate students of computer science/information technology (M.Sc. Computer Science and M.Sc. IT). Besides, practising engineers and computer science professionals should find the text very useful.

From reader reviews:

Benjamin Manno:

The book Grid and Cluster Computing make one feel enjoy for your spare time. You need to use to make your capable much more increase. Book can for being your best friend when you getting tension or having big problem with your subject. If you can make reading a book Grid and Cluster Computing to be your habit, you can get far more advantages, like add your current capable, increase your knowledge about some or all subjects. You are able to know everything if you like wide open and read a e-book Grid and Cluster Computing. Kinds of book are a lot of. It means that, science e-book or encyclopedia or other folks. So , how do you think about this publication?

Lowell Oliver:

Reading a reserve can be one of a lot of action that everyone in the world really likes. Do you like reading book thus. There are a lot of reasons why people like it. First reading a reserve will give you a lot of new information. When you read a e-book you will get new information mainly because book is one of several ways to share the information or maybe their idea. Second, looking at a book will make an individual more imaginative. When you reading a book especially fiction book the author will bring you to definitely imagine the story how the people do it anything. Third, you could share your knowledge to others. When you read this Grid and Cluster Computing, you can tells your family, friends along with soon about yours guide. Your knowledge can inspire the others, make them reading a book.

Ella Woods:

You can spend your free time you just read this book this publication. This Grid and Cluster Computing is simple to create you can read it in the playground, in the beach, train in addition to soon. If you did not have got much space to bring the particular printed book, you can buy often the e-book. It is make you much easier to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

Stacie Logan:

Do you like reading a publication? Confuse to looking for your chosen book? Or your book had been rare? Why so many issue for the book? But any people feel that they enjoy with regard to reading. Some people likes reading, not only science book but additionally novel and Grid and Cluster Computing as well as others sources were given knowledge for you. After you know how the fantastic a book, you feel need to read more and more. Science book was created for teacher or even students especially. Those ebooks are helping them to increase their knowledge. In other case, beside science reserve, any other book likes Grid and Cluster Computing to make your spare time much more colorful. Many types of book like this one.
