Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography Adaptation Science Interagency Working Group

Federal agencies in the United States are planning for climate change in many ways, including through the design of climate change adaptation actions. Like any iterative planning process, climate adaptation planning includes monitoring and evaluation components so plans and actions can be measured for their overall effectiveness. It is important for program and project managers responsible for designing and implementing climate adaptation actions to be able to monitor and evaluate the success (or at times the failure) of their efforts. Learning from monitoring and evaluating the effectiveness of adaptation actions can help the Federal government adjust their actions and responses accordingly to strengthen the resilience of communities around the Nation. To better support Federal agencies in their coastal climate adaptation planning efforts, the U.S. Global Change Research Program (USGCRP)'s Adaptation Science Interagency Working Group (ASIWG) conducted a search of numerous databases to identify examples of programs and products related to evaluations of coastal climate adaptation actions. The number of evaluations of climate adaptation actions was small, however, and those that had been done focused largely on the early stages of programs and projects. This is not surprising, as most organizations and governments are only beginning to implement climate adaptation planning and actions. To enlarge the set of evaluations for review, the focus was widened to include evaluations of other actions related to climate adaptation (e.g., those related to natural resource management, disaster risk reduction, etc.) and their evaluation resources. This review also explored the literature related to continued monitoring specifically for adaptation planning and actions, since observations and measurements are crucial for successful evaluations. This annotated bibliography presents the results of that review of the relevant peer-reviewed literature and reports from Federal, state, and local governments. It includes journal articles and publicly available reports in addition to a number of guides, websites, tools, and other resources developed for program and project managers interested in planning and conducting evaluations. A glossary of common monitoring and evaluation terms is provided at the end of this document. The ASIWG hopes that this bibliography will be a useful resource for program and project managers looking to inform their decisions on climate change adaptation planning and the evaluation programs that will help ensure their success.

From reader reviews:

Norman Williams:

What do you think of book? It is just for students because they are still students or this for all people in the world, the actual best subject for that? Merely you can be answered for that issue above. Every person has various personality and hobby per other. Don't to be compelled someone or something that they don't desire do that. You must know how great along with important the book Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography. All type of book can you see on many options. You can look for the internet solutions or other social media.

Jasmine Myers:

This Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography are usually reliable for you who want to certainly be a successful person, why. The main reason of this Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography can be on the list of great books you must have will be giving you more than just simple reading through food but feed you with information that maybe will shock your prior knowledge. This book is definitely handy, you can bring it all over the place and whenever your conditions throughout the e-book and printed people. Beside that this Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography forcing you to have an enormous of experience such as rich vocabulary, giving you trial run of critical thinking that we understand it useful in your day action. So , let's have it appreciate reading.

Cathrine Hart:

The publication with title Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography possesses a lot of information that you can study it. You can get a lot of benefit after read this book. That book exist new expertise the information that exist in this publication represented the condition of the world now. That is important to yo7u to learn how the improvement of the world. This particular book will bring you inside new era of the syndication. You can read the e-book on your own smart phone, so you can read the item anywhere you want.

Abel Cooke:

That e-book can make you to feel relax. This kind of book Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography was vibrant and of course has pictures on the website. As we know that book Resources for Evaluating and Monitoring Climate Change Adaptation Actions in Coastal Regions: An Annotated Bibliography has many kinds or variety. Start from kids until young adults. For example Naruto or Investigation company Conan you can read and believe that you are the character on there. Therefore not at all of book are make you bored, any it offers up you feel

happy, fun and chill out. Try to choose the best book for yourself and try to like reading that will.
